" *Tutti dicono quello che fanno. Pochi fanno quello che dicono.* "

Sergio Cervellin
CEO
TWT srl

TWT loves standing out and working with
Each product is designed with attention to
in order to make work easier and improve

modern, innovative and functional tools.
ergonomics, using the newest technologies
the performances.

Excellence in technologies. Brilliant performances.

TWT offers 100% Made in Italy tools and technologies with a modern design and extremely functional and innovative, thus responding to current product standards in terms of ergonomics, resistance, efficiency and attention to the environment.

Sensational looks. Style is not a luxury.

Attention to details is important. Style and forms communicate the quality of your work and your organization. In TWT, technology and design come together in a perfect balance creating a new style applied to professional cleaning.

Innovation and experience. Tailored for you.

Our experience and technical expertise are at your service.
Our creed is the craftsmanship and efficiency that have made the fortune of Made in Italy companies and the satisfaction of their customers.

Each to his own: to us the products, to you the solutions.

In a world where everybody sells solutions, we offer you purely tools!
We are focused on developing and manufacturing innovative products using the best materials: high grade PP for structural parts, POM for the moving parts, filled techno polymers for the components that require greater resistance.

100% MADE IN ITALY

Thousand are the companies that work within the plastic district where TWT was born. TWT operates with the technology, the passion, the expertise and network of one of the most important Italian industrial districts.
100% FIRST CHOICE

100% high grade plastic. Thirty years of experience in product development and thermoplastics moulding have taught that the mechanical and chemical resistance suitable for professional use is guaranteed.
High quality polypropylene for the surfaces of buckets and tools, POM for moving parts and gears, techno polymers with glass fibres in the sections subjected to greater stress.

0 KM 100% ECOLOGICAL

TWT minimizes the ecological impact of the product life cycle. From design to production, from transport to use, up to disposal and recycling. Our starting point are the quality of the finish close to our production site, in order to reduce pollution generated by transport.

OUR TECHNOLOGY

TWT technology and design are at the service of performance. Each product is designed with particular attention to ergonomics and easy-working. The selection of first choice materials with the technical design make the difference in the word of cleaning!

OUR SYSTEM

TWT offers 100% Made in Italy tools and technologies, with a modern and extremely functional design, thus responding to current product standards in terms of ergonomics, resistance, efficiency and attention to the environment: from washing trolleys to service trolleys, from industrial mops to flat mops.

Polypropylene Copolymer

This material is used to produce all our buckets, the surfaces of the Giotto trolley, Duetto body and Prexa.

The PP copolymer is more resistant, melts at a higher temperature, moreover possesses high resistance against the chemical agents: it retains its strength characteristics in the presence of aqueous solutions containing salts, acids and strong alkalis. We use only non-recycled PP with great flexibility and strength that provides excellent shock-proof performance both on high and low temperatures.

Polypropylene copolymer is a thermoplastic elastomer with better mechanical characteristics than the more commonly used Polypropylene monomer.

POM Acetal Resin

POM: This is a semi-crystalline copolymer of great mechanical characteristics.

It is characterized by a series of properties that place it, as an alternative solution to substitute some metals such as steel, brass, aluminium in many mechanical components. Null water absorption, great dimensional precision and mechanical stability.
It is suggested and use whenever strength and tight tolerances are required.
Using the first choice POM, TWT maximizes hardness, stability and the wear resistance.

Composite plastic

Our strong competence and experience in techno polymer technology allows us to develop particular composite materials when a target approach is needed to satisfy specific technical needs with innovative solutions: this is the case of the Prexa torsion shaft, of which its mechanical and chemical resistance; another example is the structure of Plano for which a particular formulation in ABS has been developed that highlights its characteristics of lightness, rigidity and impact resistance.

Materials

In addition to excellence in design and engineering, the quality of the materials makes the difference in terms of product reliability and durability.
The main material that constitutes the Opera trolleys is copolymer polypropylene: it is a thermoplastic elastomer with better mechanical characteristics than the more commonly used Polypropylene monomer. It is more resistant and it has higher resistance to chemical agents, it melts at higher temperatures and has excellent shock-proof performance both on high and low temperatures.

Our environmental policies

The raw materials we use come from non-renewable sources. Therefore, we apply efficient and advantageous solutions, both on economic and on ecological point of view.
The Polypropylene component, in most of our products, is perfectly recyclable.

Our highly integrated production chain reduces the incidence on environmental pollution by minimizing the emission of harmful gases due to road transport.

Certified Quality

TWT is **ISO 9001:2015** certified. This means that our quality system is not only focused on products but it concerns all our management processes and the organization we implement to serve the market.
TWT srl is ISO 14001:2015 certified. This confirms that the organization and the management system are adequate to keep the environmental impacts of the different company activities under control and systematically oriented to the improvement of environmental performances in an effective and sustainable way.

The TWT range in recycled plastic materials:
respects the environment,
maintains elegance and design.

⬡ **Solid**

⇧ **Manoeuvrable**

✶ **Easy to clean**

〰 **Silent**

◯ **Compact**

Certification
• Environmental declarations according to UNI EN ISO 10021: 2016, required by the CAM (minimum environmental criteria) for public sector purchases.
• The entire production process is monitored and verified by the competent authorities.

High performance
• Greater amount of recycled plastic (90%): percentage higher than competitors.
• More robust and reliable products: the structure of the OPERA trolley consists of more structured base, double-layer panels and doors, resistant brackets in aluminium.
• Recycled does not mean less reliable!

OPERA **ReUse**

GIOTTO Top Bin **ReUse**

Market trends and behaviour of public and private
organizations are increasingly oriented towards green solutions,
eco-sustainability and the use of recycled materials.

• ReUse line: over 90% of the plastic is recycled. A figure well above the competitors and the minimum required by national law (Italy) which requires at least 50% to obtain the certification of "recycled plastic" required by public tenders.

• The other materials in our products are mainly recyclable metals,
this means that almost 100% of the materials that make up the TWT ReUse
range are recyclable.

The dark colour is required to obtain smooth finish surfaces and good aesthetic results when the polypropylene used is recycled.

Our ReUse line associates the black colour with the aluminium finishes, grey or red. The aesthetic effect is very impactful and always guaranteed!
An elegant product that fits everywhere: from hotels to airports where the image is important and the product is often visible to guests.

INDEX

NEW

SOLAR SYSTEM

GREEN TECHNOLOGY

The new instant impregnation system, digitally programmable.

Disinfection of floors and surfaces thanks to the spray lance.

Solar System is GREEN, environmentally friendly:
Easy for anyone, powered by solar panels,
scheduled in the use of the detergent,
thus, reducing the consumption of water,
chemicals and energy.

Detergent saving.

The cleaning solution is released with a touch thanks to the dispensing pump in the cart. The dose to be delivered is programmable using a specific software or through the integrated panel.

• The quantity of solution dispensed is scheduled with precision according to the specific characteristics of the mop replacement and floor.
• Only the filament, in contact with the floor, is impregnated. This allows to reduce the normal quantity of solution foreseen by the traditional impregnation systems.
• Solar System allows to impregnate only the replacements actually to be used in the daily service, thus avoiding the reconditioning of replacements that are not used. This could not be done using the common system of pre-impregnation.

Time and energy saving.

The pump is powered by a 12 Volt battery that is also supported for 30% by two solar panels. This mechanism allows you to take advantage of the natural or artificial light present in the rooms, guaranteeing product autonomy up to 1600 sprays. The battery is rechargeable by connecting the charger to an easily external connection.

• Solar System reduces the time of mop replacements' preparation.
• The presence of solar panels permits to increase the autonomy of the trolley, reducing the charging times and energy consumption.

Technological innovation ecological evolution.

Better hygiene

• Floors are always cleaned with uncontaminated mops. The system is designed to prevent dirty water be moved between different environments or departments.

• The detergent or disinfectant is dispensed immediately before use, in order to maintain its properties unaltered.

Better efficiency

• Solar System does not foresee the pre-impregnation of the mops to be used, as the impregnation is instant.

• It is possible to hook directly the mop and to place it in the tray containing the solution, without touching the mop.

GREEN, environmentally friendly.

• Allows a 50% reduction in the consumption of water, detergents and electricity.
• It is combined with TWT ReUse trolleys made of plastic CAM certified recycled.

1/2/3 programmable dispensing pumps.

In the dedicated compartment, it is possible to place **up to 3 tanks of 5 litres of detergent** or disinfectant solution.

TWT Custom - the **programmable electronic control unit able to manage and control up to 3 dispensing pumps:** A pump, can be used for the disinfectant's nebulization using the special spray lance or spray gun. The control unit optimizes the management of solar charging and the monitoring functions thanks to the download of data on use and consumption.

Optional: Spray lance or spray gun

Solar System functionality can be improved, equipping it with a spray lance or gun for the nebulization of disinfectant solutions on the surfaces as required by the Sanitation Protocol.

Change of programs must only be carried out by qualified personnel or it can be agreed with TWT, in advance.

◆ Available with nozzle or gun

** The mixing percentage is set at 3% as a lower quantity would be unstable.
It is recommended to carry out some tests before use.
The percentage varies according to the viscosity of the concentrate.

COVID SECTION

Description

HYGIEN TOWER
Disinfection station made of bi-laminated multilayer wood.
It is equipped with a compartment for:
- surgical disposable face mask
- hand sanitizer
- paper towels
- disposable gloves
- trash bin

Code	pcs	
WHITE **HYGIENT.W**	1	
BLACK **HYGIENT.B**	1	

Product dimensions	400x410x1450 mm
Packaging dimensions	400x400x1200h mm
Volume	0,19mc
Weight	9,0 kg

The disposable surgical mask of TWT srl is an high quality medical device, used in protocols to reduce the risk of spreading infections in particular during the current COVID19 emergency. MASK3000 is a Class I, Type IIR Medical Device (Reg. Ministry of Health 1990524). It complies with the technical standards UNI EN 14683: 2019 UNI EN ISO 10993¬1: 2010 UNI EN 14971: 2012 UNI EN 1041: 2009 UNI EN ISO 15223¬1: 2012 and therefore meets all the requirements of efficacy and safety.

Description

DISPOSABLE FACE MASK
MASK3000 is anatomical and adaptable to any shape or size of the face. It is equipped with two comfortable ear elastics and a practical, easily mouldable nose pad, which guarantee maximum safety, adherence and practicality.

- Layers: 3 (internal/external: SPUN BOND intermediate: MELT BLOWN)
- Material: TNT 100%
- Bacterial filtration efficiency (BFE%) ≥ 98%
- Differential pressure (Pa/cm^2): <60
- Microbial cleanliness (ufc/g): ≤30
- Splash resistance pressure (kPa): ≥16

GIOTTO

MOPPING TROLLEY

- **Solid**
- **Manoeuvrable**
- **Easy to clean**
- **Versatile**
- **Silent**
- **Compact**

Giotto is a mopping trolley used for small and big floors. It is built with first choice materials treated with EASY&CLEAN mode which permits less adhesion of liquids and dirty on its surface.
The techno-polymer wheels, developed in TWT, ensure great manoeuvrability and noise-free. Different versions are available thanks also to the innovative configuration of accessories.

WHEEL

SILENT WHEEL is the newly designed wheel in bi-component techno polymer that guarantees maximum manoeuvrability and silence during use. Made in Italy, designed and created by TWT.
PREXA

Excellent solidity: innovative technical design of the structure; selection of the best quality plastic material, not recycled. Maximum resistance and reliability.

STRUCTURE

Better cleanability and hygiene: surfaces of structure and buckets are treated with Easy & Clean mode which guarantees less adhesion of liquids, dirt and facilitates its washing.

DUETTO

WASHING TROLLEY

High performances:
the largest in its category, 40L of total capacity. With the wringer installed, 15L of clean detergent solution and 15L effective for the dirty water. The larger dimensions facilitate the correct washing cycle in 3 phases:
1) soaking and squeezing clean mop
2) washing
3) rinsing and squeezing dirty mop

QuickOut:
Quick-connect double drain plug system for faster and safer emptying of water (clean / dirty).

Better hygiene:
the Duetto bucket is treated with Easy Clean mode to facilitate washing.

- Solid
- Manoeuvrable
- Easy to clean
- Versatile
- Silent
- Compact

PREXA

WRINGER

PREXA, down press wringer can be used on all TWT mopping trolleys and it is compatible with all similar trolleys of the major players on the market.
Prexa is available in 2 versions:
Prexa I – down press wringer, POM wringing bars, version with rubber inserts
Prexa S – down press wringer with press bar in Delrin without rubber inserts

✋ **Ergonomic**

🧩 **Universal**

📦 **Solid**
PREXA

WRINGER

Better **ergonomics**, thanks to the efficiency of the mechanical lever.

Universal wringer: the innovative press bars with integrated rubber inserts make Prexa (Prexa I version) the real universal wringer. It can easily wring Kentucky mops as well as any type of flat mops.

Great endurance: Techno polymers filled with fiberglass, first choice PP and Delrin.
Advanced technical design, moulding and mechanical processing strictly Made in Italy, make Prexa a champion of resistance.

VOLO
FRAME

Ergonomic

Non-deformable

Solid

Fast
High impact materials.
Non-deformable thanks to the aluminium structure. The orange ends are made of Delrin and elastomers. Impact and wear resistant.

Rubber clips.
Volo can be used with different types of disposable cloths.

Simple.
Volo thanks to the EasyLock mechanism locks the frame in the optimal position for cleaning high surfaces.

AMBO-NEMO

BUCKETS
Better hygiene: the surfaces of the buckets are treated with Easy & Clean modality to improve cleanability. The grid on the bottom separates the mop from dirty water, optimizing cleaning and hygiene.

Solid sieve: it is made of polypropylene and its up position allows to maintain the effective capacity of the bucket.

Double bucket 15L: (8 L clean water + 7 L dirty water) allows greater operating autonomy.

- Ergonomic
- Universal
- Solid

SURF
FLOOR SQUEEGEES
⨝ **Non-deformable**

▢ **Solid**
》》》 **Fast**

Surf: the particular wave profile and the flap placed above the rubber reduce the escape of splashes after the passage.
It works faster and more precisely even on irregular surfaces or when there is a lot of water.

Cloth fastener: the special clips on each side help to fix the cloth to the floor squeegee when it's needed

Rubber: its particular structure improve its ability to manage liquids and its working life

✴	**Easy to clean**
▭▭▭	**Versatile**
〜	**Silent**
◯	**Compact**

OPERA trolleys represent the flagship product of TWT's world both for technical development rate and for sales success.

TWT offers its customers the most modern and functional line of multipurpose trolleys: tools with a great aesthetic appearance that enhance the quality of work and the companies' image. OPERA meets the needs of each customer and the demands of each sector, thanks to the wide range of accessories.

CLEANIG TROLLEY

HEALTHCARE

SERVICE TROLLEY

HO.RE.CA TROLLEY

OPERA also stands out for the great availability of accessories: as the transparent document holder or Pad holder (the key is placed under the lid for better hygiene) or the innovative frame holder that allows to hold up two frames with their replacements. Opera's doors can be locked to prevent unauthorized access to detergents, accessories or other tools: safety is an important factor in many environments, from healthcare to places frequented by children.

OPERA

SERVICE, CLEANING AND HO.RE.CA TROLLEYS

Tools Technology

Lateral trays and frame holder

Wheels

of different diameters/ for the different types of floors

Imop holder

SPEED SYSTEM

Speed System: the innovative, easy and fast motorized system.

Speed System is a motorized system, that can be applied to all closed Opera trolleys.

It is designed to move easily heavy trolleys (weight up to 200kg) over floors or ramps (inclined up to 15%).

SPEED SYSTEM is available for OPERA and OPERA ReUse.

15%

- Electric circuit activation with key
- Speed variation on the handle
- Button for changing direction
- Great manoeuvrability thanks to the wheel traction and metal central handle.
- 2 safety brakes to guarantee a high safety standard

Electronic ignition key and speed adjustment with button for immediate stop

Starting button

Charging electrical outlet

Long-life electric motor with integrated motorized wheel Ø150mm

⬡ **Solid**

↱ **Manoeuvrable**

〰 **Silent**

○ **Compact**

Charge autonomy always under control
Up to 40 km of autonomy thanks to the high-capacity battery (12V, 27Ah).

Remaining charge always visible, monitored by the numerical display.

Simple and effective, also in terms of cost: the electrical and mechanical components have been made smaller so the space was optimized.

High efficiency:
very fast with zero effort

TWT by LEWI

TWT window cleaning line is developed in collaboration with LEWI PROFESSIONAL, a German leader in this sector. These are professional tools characterized by great quality and efficacy appreciated by all window cleaning specialists.

Window squeegee rubber blades: natural and restistant

Bi-component erogonomic handle

Window squeegee supports are adjustable and all borders are rounded to prevent any accidental injury or scratch

Innovative materials: thanks to a particular manifacture process, the alluminium poles are more strong and solid, mateining a great lightness to reach till 16 m height.

New locking connectors: the anti-rotation system improves the control and safety of tool when working at great heights.

Safe connection technology: all tools are locked through a safety connection cone to prevent accidental falls while working at great heights.

Purchase orders placed to TWT Srl are submitted to the ongoing sales terms and conditions, except otherwise agreed between the Parties in each specified contract

1. TWT PRODUCTS

a. All products manufactured by TWT Srl conform to safety and quality standards and are suitable for their proper use.
b. Technical specifications, descriptions and pictures related to various products listed herein are purely indicative and TWT Srl reserves the right to amend such information in the case any change is considered necessary.

2. PRICES

a. All prices herein do not include VAT and delivery terms are EX-Works Castelfranco Veneto (TV).
b. The prices herein specified ae valid until further modified

3. PURCHASE ORDERS

a. All purchase orders are accepted only after approval by TWT Srl.
b. Minimum amount per order accepted is € 500,00, VAT not included.
c. All quantities in the purchase orders shall refer the standard single packing; quantities ordered shall be multiples of the single packing.
d. Each purchase order shall include product code, description and quantities requested.

4. PACKAGING

a. Packaging is included in the price list only if products are packed following TWT standards.
b. Extra charges are added for customized packaging, on request. For mop wringers packed separately from the trolley, an extra charge of € 0,70 will be added.

5. PAYMENT

a. The client undertakes to pay for the goods in accordance with the terms agreed with TWT Srl and indicated in the invoice.
b. In case of expired and delayed payments, the interest shall be calculated at the current rate.
c. Goods are to be retained of TWT Srl exclusive property until payment made.

6. DELIVERY TIMES

a. Delivery times are agreed in the trade agreements.
b. Delivery times are not compulsory. A delay in the delivery shall not be cause of any delay in payment and not allow to any request for damages.

7. TRANSPORT

a. The withdrawal and transport of goods are at Client's expenses.
b. The cost of transport is normally at Client's expense, unless otherwise agreed between the Parties.

8. NON-COLLECTION OF GOODS

a. Non-collection of goods, within a period of thirty days from the date agreed, shall allow the seller to cancel the contract "ipso iure". Any payment received in advance shall be withheld by the seller, as penalty, except for the case of a heavier loss.

9. SALES RETURNS

a. All returns are subject to prior approval by TWT Srl.
b. Once the returns are authorised, the goods shall return free of damage and in their original packaging. Otherwise, packaging costs shall be added.
c. All transport costs are on the client's expense.

10. HOW TO USE GOODS

a. TWT Srl shall not be liable for any damage caused by or to the products due to improper use, non-compliance with the instructions (where provided), lack or inaccurate maintenance, tampering or alteration of the products.

11. CLAIMS

a. Once the goods have been delivered at his premises, the Client shall check and inspect them. Any remarks or comments related to damages or missing items shall be made at the moment of delivery to the carrier and mentioned on the delivery note.
b. Any defects or lacks shall be notified in writing to the seller within the times described by the law in force.
c. Claims received verbally or on the phone shall not be considered as calid.
d. No claims shall be accepted without authorization by TWT Srl.

12. PRICE LIST

a. The current price list cancels all previous price lists.

13. IMAGES AND TRADEMARK

a. Images, photos, company logo and each form of representation of TWT Srl items and trademark are of its own property. Their use is therefore forbidden, unless expressly authorized by TWT Srl.

14. ACCEPTANCE OF SALES TERMS AND CONDITIONS

a. The Client expressly agrees to all the sales terms and conditions herein once he places a purchase order.

15. APPLICABLE LAW AND COMPETENT COURT

a. Any dispute or controversy arising from the contract or transaction hereunder shall be submitted to the sole jurisdiction of the Court of Treviso, Italy.

Certification EU - ECOLABEL

The EU Ecolabel certification represents tangible and credible evidence of environmental excellence. In a context populated by acronyms and logos of all kinds, the EU Ecolabel qualifies products that have passed a rigid set of ecological compatibility criteria defined at EU community level. Based on the ISO 14024 standards, the EU Ecolabel is a basic reference for the evaluation of the most environmentally friendly cleaning products according to the logic of the National Green Public Procurement Action Plan (PAN GPP),
For TWT this step represents an important recognition and a logical extension of our long-term commitment to the environment. It is a guarantee to customers who with TWT are purchasing 100% ecological products, be they in textile or other materials (such as, for example, recycled plastic Re-Use trolleys).

We have decided to certify with the EU Ecolabel our MICRO COLOR Velcro flat mops, four of the flagship flat mops in our sales. We made it following a very demanding path verified by an external certification body, a process that was facilitated by the high quality standards that TWT already applies to its productions consistent to the criterrequired by Ecolabel:
- non-use of materials and substances dangerous to health and to the environment (for example the presence of pesticides in cottons),
- limited air or water pollution during the production processes of the raw material as of the finished products,
- safety and resistance of products and colors to rubbing and to the exposure to atmospheric agents,
- resistance of the fabrics and limited shrinkage following washing and drying.

MICRO COLOR type flat mops are made with microfiber yarn to be very flexible and versatile. It combines, in a single product, the advantages of microfibre with the particular processing of the yarn. They are excellent in removing dirt and in absorbency thanks to the microfilaments of the microfiber; as well excellent is the dirt collection capacity thanks the closed loop yarn.

MICRO COLOR is particularly suitable for use on smooth floors, specifically designed for use in healthcare, ho.re.ca,

and food industry, it does not release lint and does not develop bacteria.
The differentiation of the color code for risk areas is carried out directly on the Velcro to prevent in a practical and immediate way any risk of incorrect application of the colour differentiation in the implementation of the cleaning protocols. The use of non-shrinkable supports and the resistance of the yarn make it a champion of resistance with up to 1.000 washes.
Certification KIWA / ACCREDIA

TWT is **ISO 9001:2015** certified. This means that our quality system is not only focused on products but it concerns all our management processes and the organization we implement to serve the market.
TWT srl is **ISO 14001:2015** certified. This confirms that the organization and the management system are adequate to keep the environmental impacts of the various company activities under control and systematically oriented to the improvement of environmental performances in an effective and sustainable way.

MINISTRY OF HEALTH

MASK3000 is a Class I, Type IIR Medical Device (Reg. Ministry of Health 1990524)
It complies with the technical standards UNI EN 14683: 2019 - UNI EN ISO 10993-1: 2010 - UNI EN 14971: 2012 - UNI EN 1041: 2009 - UNI EN ISO 15223-1: 2012 and therefore meets all the requirements of efficacy and safety, even for prolonged use.
